11 426

Rear with large industrial windows

11 426 H0 Factory fire brigade

Our special machine factory "August Hagen AG" has now reached enormous proportions. Many people are employed there. The work's own fire brigade has also been established. With its plastered walls and red doors, it sets itself apart from the other brick buildings.

A wooden door is fitted to the annex and the main building has with rolling doors which can be opened or closed using the enclosed stationary rails. The roof is of sheet metal in a standing seam design. The hose tower, siren and tool boards are enclosed. A wall and a gallery serve as a separation between the vehicle hall and the social wing. This model is of the same design as our modular system and can be extended as required.

You can find similar fire stations in small villages.

Available from 07/2011

RRP 39.90 EUR

200 x 105 x 103 mm

Modular System

You can use the following articles to supplement our models 11 421 factory gate, 11 422 factory building, 11 423 production building and 11 426 factory fire brigade as you require, or you can also use them to build you own customised factory. All of the parts in the article No. 80... series are a part of our modular system and are therefore compatible with each other.
