

Farewell to a legend of railway  
history!

ROCO & FLEISCHMANN special coach project in cooperation with DB

## 2nd class express train coach “55 Years of InterCity”

### The story behind the model

For 55 years, InterCity has connected people, regions and generations. With its distinctive comfort, iconic locomotives and high-quality travel experience, it has played a defining role in the history of long-distance rail travel in Germany. Many innovations that are now standard on ICE trains were first introduced with InterCity and set new standards for rail travel in Germany.

In autumn 2026, a significant chapter in railway history will come to an end. Together, we want to look back on 55 years of InterCity, celebrate special moments and at the same time bid farewell to the Intercity 1 and the Class 101 and Class 218 locomotives in long-distance service. To mark the occasion, the Intercity 1 will embark on a farewell tour starting on 25 September 2026.

Together with Deutsche Bahn AG, ROCO and FLEISCHMANN are sending a specially designed commemorative coach onto the rails, which will take part in all farewell journeys.

## Highlights of the 2nd class express train coach models “55 Years of InterCity”

### ROCO H0 Item No.: 6200324
